

Guidelines for embedded experiments in ecological restoration and management in Australia

- **Wednesday 8th November 2023**
7.30am – 8.30am (AWST)

GUIDELINES FOR EMBEDDED EXPERIMENTS IN ECOLOGICAL RESTORATION AND MANAGEMENT IN AUSTRALIA

ONLINE ONLY EVENT

These guidelines provide a framework for planning and implementing standardised experiments within restoration projects to help build a national research network. They include real-world case studies, putting concepts into practice.

Practitioners from local and state governments, consulting, industry, Landcare, and natural resource management groups, and non-government organisations, who design and implement restoration projects, are encouraged to attend the launch of these guidelines to integrate simple yet effective experiments into their restoration.

Guest speakers

- **Suzanne Prober**, Vegetation Ecologist
- **Lucy Commander**, Restoration Seed Ecologist
- **Lind Broadhurst**, Senior Research Scientist
- **Keith Bradby**, Chief Executive Officer, Gondwana Link

Hosted by The Western Australian Biodiversity Science Institute, this webinar is featured in the virtual component of the global conference of the **Society for Ecological Restoration (SER) Darwin 2023**
